

DISTRICT ASSESSMENT OF READING TEAM (DART)
QUESTION AND ANSWER SHEET

GRADE
7
SPRING

Thrills and Chills (Jeff Savage)

Name: Ashley S Female Male School: _____

1. Using the Venn diagram, compare steel coasters to wooden coasters. Use the back of the page for your answer.
2. Examine the chart "Roller Coasters Over Time." What are two things that surprise or interest you in the timeline?

- 2 things that surprise me and interest me is that the
world's scariest roller coaster is built in Canada in 1927.
- In 1992 the first successful inverted coaster was built.

3. Using the back of this page, diagram with labels to explain the details of North America's first roller coaster.
4. What do you predict will be the next improvement in roller coasters? Why?

seat
change

I think the next improvement will be when the seats
are 3 feet approx. higher above the carts.
I think because it will give a person more thrill soaring into the
air higher than before. Almost giving a person the experience to fly.

5. Was this easy or hard to read? Explain why.
This was easy to read because everything you needed
to find was right there in front of me and it was all
put together very well.
