

Excess

- las Cuevas del Drach (Dragon Caves)
- Situated half kilometer away from Mediterranean sea
- Stalactites Stalagmites pretty, so tourists love them.
- Prehistoric
- Made of soluble rock; limestone.
- limestone contains many remains of animals.
- Tectonic forces make limestone crack and water forces it into a cave.
- As caves forming, dripping water creates stalagmites/stalactites. ü
- 1338 discovered, but named Dragon appeared in 1632.
- Believed that the caves represented evil, strength + treasure.
- Largest subterranean lake in Europe named Lake Martel, newly discovered.
- Martel was the 1st one to approach + explore caves with scientific interest.
- Arabic Vase + Roman Chandelier indicates being explored long ago.

Origin of the Caves

PEOPLE + HISTORY + CAVES

clearly understands; some detail missing
